How to order:

You can send your wish list and desired plants size to us to check the available status or you can also find the list of available plants in the Price list section.

Plant size:

The price list above is the price for rooted small plants (Size S) or cuttings depends on availability. Each option type may have size M or L but we need to check our stock after your request or order.

Size S is small plant or cutting with 1-2 nodes (2-4 leaves). Other types will be 2 nodes or more or our garden will get the best plant for you base on current stock.

Size M is medium plant with more nodes and longer in length compared to size S (about 70cm - 1 meter long)

Size L is large plant with more nodes and longer in length compared to size M.

You can inbox for picture of plant size before placing order

Delivery:

- United States, EU, UK, SINGAPORE, CANADA, AUSTRALIA...
- Notice: Shipping with No/without Phytosanitary documentation
- Shipping Carrier: DHL (Door to Door)
- Delivery time = 2-7 days

Packing:

Plants' root will be cleaned and wrap in sphagnum moss before shipping, roots might have some little soil mix left

Due to restriction in custom process, we won't be able to provide separate tag names on plants, plants' name will be written on the plants or on the underside of the leaf.

We ensure to carefully carry out the packing process to bring the best products to our customers.

*The package will be labeled as fake plants/flowers and shipped to you as GIFT.

Being described as fake plants/flowers, there's no need for phyto for custom clearance

Shipping Cost From DHL:

Weight/KG	USD
1 kg	\$60
2 kg	\$70
3 kg	\$80
4 kg	\$90
5 kg	\$105
6 kg	\$125
7 kg	\$135
8 kg	\$145
9 kg	\$155
10 kg	\$165
11kg-15kg	\$16/kg
16kg-21kg	\$15/kg
21kg-31kg	\$14/kg
31kg up	\$13/kg

How to Calculate Volumetric Weight

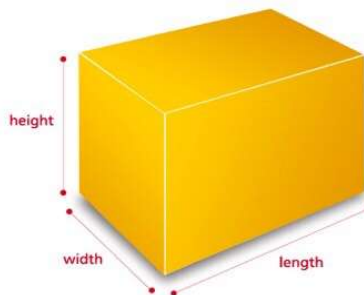

To calculate the volumetric weight of your shipment, simply multiply the length (cm) x height (cm) x width (cm) and divide the result by 5,000.

For example...

You are sending a package that weighs 8kg, but the dimensions are 40cmx 3cmx50 cm.

$$\frac{40 \times 30 \times 50}{5,000} = 12\text{kg}$$

If you're sending multiple packages, calculate each weight separately and this is the 'total chargeable weight'. The chargeable weight is always the greater of the actual or volumetric weight.

Service and warranty:

If the customer receives a plant that is completely damaged but not due to weather or delay, the garden will compensate 50% of the value per damage plant (please provide related pictures or videos).

It's inevitable and unavoidable that some leaves might fall or turn yellow after long way of transportation

BOT garden is only responsible for shipping costs in case the box is lost.

Please read the terms and conditions carefully before paying!
